- Traveling

Bittu kumar

Frontend Developer

PROFESSIONAL SUMMARY

Diligent front-end developer with robust HTML, CSS, and JavaScript expertise. Proficient in Git and DOM manipulation. Adept at Python and fundamental data structures/algorithms. Committed to delivering engaging user experiences, eager to leverage skills in an internship role.

PROJECTS

1. Cloneof Chargebee Website | 🌐 | 💻
HTML | CSS3 | JavaScript

- Developed a replica of Chargebee's website with dropdown menus using HTML, CSS, and JavaScript.
- Added a Demo button and form.
- Added a dropdown menu on the navbar.
- Created a form to request a demo.
- Completed individually within 5 days.

2. Social Media Content Downloader | 💻
Python language | Instaloader | Pytube

- Constructed a Python-based tool enabling the extraction and download of social media content.
- Leveraged Instaloader and Pytube libraries to efficiently retrieve data from Instagram and download video/audio content from YouTube.
- Independently developed within a 5-day timeframe.

3. ECommerce Website
HTML | CSS | JavaScript

- Homepage: Provides an overview of the platform and highlights featured products or promotions.
- Signup/Login Pages: Allows users to create accounts or log in, ensuring secure access to the platform.
- Product Pages: Displays a catalog of items available for purchase, each with detailed descriptions and images.
- Cart Page: Enables users to add, remove, and manage selected items for purchase before checkout.
- Admin Page: Accessible exclusively through specific credentials (ID and password), providing administrative functionalities for site management.
- Authentication Barrier: Implements strict authentication protocols, restricting access to product and cart pages until users have logged in, ensuring security and privacy.

4. Walmart Clone | 🌐 | 💻
React | Chakra UI | Axios

- React-based front-end web application
- Emulates core functionalities of an online shopping platform
- Seamless shopping experience with product browsing, searching, and adding to cart
- Checkout process with shipping details and order summary
- Implemented false account creation and user login functionality
